Art Unit: 1731

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a process, classified in class 264, subclass 670.
 - II. Claims 13 and 14, drawn to a SiC body, classified in class 501, subclass 88.
 - III. Claims 15-19, drawn to a green body, classified in class 252.
 - IV. Claims 20-24, drawn to a slurry, classified in class 252.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (Group I) and (Groups II,III and IV) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the products as claimed can be made by another and materially different process such as one which includes combining materials to create a slurry and then treating the slurry to produce therein one of the recited components, e.g. an organing gelation agent .
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1731

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
